Customer Price List

DISCLAIMER: Please note that this document is known to be accurate as of the date published. However, it may not necessarily reflect the most up-to-date pricing information due to unforeseen changes. Please contact PHCE LS for any questions or discrepancies regarding invoicing.

General Terms & Conditions

- **Cost Analysis**: The prices in this Public Health Command – Europe (PHCE), Laboratory Sciences (LS) price list are strictly cost-based. The prices are subject to change without notice. All self-generated quotes based on this price list are only an estimate of the actual costs of analysis to include sample prep and processing but not shipping costs. The final invoice for all work indicates actual costs to the laboratory.
- **Price List Revisions**: Due to the wide geographic distribution and turnover in customers, LS neither maintains a list of recipients nor automatically provides updated copies of this price list. Please check occasionally with LS to ensure you are using the current revision. The contents of the LS Price List are subject to change based on method revisions, updates, or changes.
- **Sample Analysis Priority**: LS provides in-house analytical services at three levels of sample priority. LS is not responsible for and has limited influence on contract lab turnaround times:
  - **Priority Levels**
    - Routine: Standard laboratory priority. Thirty (30) Calendar Days.
    - Immediate: Elevated laboratory priority based upon potential health risk. A brief written justification is required. Fourteen (14) Calendar Days.
    - Emergent: Highest laboratory priority based upon potential or acute health risk. A written justification is required; ≤ Seven (7) Calendar Days (method dependent).
  - **TAT Disclaimers**
    - Laboratory Turnaround Time (TAT) is expressed in calendar days. Sample workload and laboratory manpower can impact the ability of the laboratory to meet the TAT goal.
    - TAT for all analyses are goals and are not guaranteed. LS' commitment to the customer is that we will ensure the in-house Laboratory Handling and Processing of samples is in accordance with the agreed sample priority. However, we cannot guarantee that the TAT goal will always be met.
    - Emergent Priority samples are analyzed ahead of all other samples. LS personnel will endeavor to work overtime, holidays, and weekends to provide the minimum TAT possible for sample analysis {Overtime and Weekend work will increase labor charges for the project}.
- **Methods**: Please refer to the LS Table 1 on the PHCE public website.
